2. Reason for revision

MORI TRUST Sogo Reit, Inc. (MTR) revised its previous forecast dividend per investment unit for the fiscal period ended March 31, 2010, as shown in the table above, because the dividend per investment unit was expected to change more than 5% when the investment status for the fiscal period became clear in the process of closing accounts. The main factors for the revision are real estate rental expenses and interest paid, which were lower than anticipated.

The forecast dividend per investment unit is as of today, and an actual dividend per unit may change. The forecast does not guarantee the dividend per unit.

3. Other

As described in the press release titled “Acquisition of Asset (Contract to Be Concluded) — Tokyo Shiodome Building” dated April 8, 2010, the performance forecast for the fiscal period ended September 30, 2010 (17th fiscal period, from April 1, 2010, to September 30, 2010) is being reviewed and will be announced as soon as the review is concluded.
